DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 7-12, 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al. US 6,140,418.
- 3. The rejection set forth under 35 USC 103 in the paper mailed 1/11/08 is deemed proper and is herein repeated.
- 4. Applicants newly amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.
- 5. Applicants argue that the invention as now claimed is to be "spray-coated" on the inner surface of a pneumatic tire. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., spray-coated) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
- 6. Further, one of ordinary skill would be motivated to "apply" the sealing material disclosed in Yamashita to the inner surface of a pneumatic tire given the disclosed properties of the sealing material. Specifically, Yamashita teaches that the sealing

Application/Control Number: 10/547,334 Page 3

Art Unit: 1796

material is functional in hermetically sealing materials and provides gas barrier properties, See the abstract and column 12 lines 5+. These are properties desired in sealants for the inner surfaces of pneumatic tires. One of ordinary skill would readily appreciate the features and be motivated to apply the sealant of Yamashita to the inner surface of a pneumatic tire. Further, it is noted that "conventional practice" has been to apply sealant materials to the inner surfaces of pneumatic tires.

7. The viscosity limitation is presumed to be either anticipated or obvious from this disclosure. These are the same compositions that can be formed in the same manner as claimed. It is reasonable to presume that the same materials formed in the same way posses properties that either anticipate or render obvious those claimed.

Applicants arguments as to how the spray-coating application are dependent upon the claimed viscosity are not persuasive. The claims do not recite spray coating.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Peter D. Mulcahy/ whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
